Introduction

HISTORY

Over 30 years in the making

In 1989, two Physiologists started designing chairs for people with postural problems and specialist seating requirements. They were unsurpassed in the industry with over twenty-six years' experience resolving posture related pain. In 2014, in recognition of their brilliant design work, Ergonomic Seating Solutions took over their product portfolio and have been growing business through quality, innovation and customer service.

DESIGN

We're all different, we understand that

Chair and body is a partnership and we all have differing needs which is why we design chairs with the user at the heart of the process. We create continuity between user and chair with support and comfort provided in the right amounts and in all the right places. Furthermore, we know that choosing furniture doesn't just end with meeting a price-point or physical need. Aesthetics are also central to choice. That is why we offer a wide range of fabrics, colours and finishings so our chairs can add distinction and harmony to the workplace.

FLEXIBILITY

We do bespoke as standard

We offer a truly unique range of seating with a multitude of design decisions that go into producing the end result. Add to that the vast amount of easy-to-specify options available and you can be sure that a chair built by us is flexible enough to meet even the most diverse requirements.

CUSTOM-FIT

Beyond flexibility

Our Custom-Fit system maps the body allowing us to fine-tune and sculpt a chair to the user's form. Backrests and seats can be profiled to provide optimum comfort and support no matter what the end users shape, size or medical condition. Custom-Fit assessments can be carried out UK wide, or we can assess in our showroom.

PRODUCT RANGE

Everything you need

Our best-selling OPERA range is highly-customisable and can be produced to exacting requirements. NOVUM Plus chairs provide an entry-level ergonomic option that's feature-rich making them an excellent choice for contract furniture. ORBIS chairs offer a suitable ergonomic upgrade from a standard office chair when budgets are limited. HALO chairs are an exciting new development with a design that facilitates fluid movements for tasking and easy alterations between sitting and standing.

CUSTOMER SERVICE

Your happiness, our pleasure

Without customers, we are nothing which is why delivering excellent customer service is central to what we do. We believe in a partnership approach and provide high-quality training and support for our customers so accurate recommendations can be made. Your customers are ultimately ours...

How To Sit With A Healthy Posture

Modern work routines mean we are spending an increasing amount of time sat at our desks, which is potentially damaging to our health, unless we are sitting correctly. For a healthy posture, the spine should be lengthened and the natural 's' shape of the back promoted to avoid a hunched or slouched position. Follow the guides below to ensure a healthy posture when using your chair.

How Posture Affects Disc Pressure

The adjacent images show how differing seating positions affect intervertebral disc pressure in the back. The neutral position when stood is measured as 0% with the seating positions adding progressive amounts of pressure.

POSE™

Our FREE chair fitting service

Ensuring the right chair for you

Finding the right chair can be a difficult and time-consuming task, but this needn't be the case. The Ergosol POSE™ chair fitting system allows us to accurately specify chairs for users in a simplistic and stress-free manner.

What is POSE™?

POSE™ is a chair fitting system that captures meaningful user data so appropriate chairs from the OPERA range can be specified.

How does POSE™ Work?

POSE™ captures data such as user environment, work routines, body measurements and existing areas of discomfort in an online or downloadable form. This information allows assessors to make chair recommendations in an informed manner ensuring optimum comfort and support for the user.

Personalised Fitting & Modular Designs

POSE™ allows us to accurately determine which backrest and seat are most appropriate for a user. There are six backrest and nine seat sizes to choose from. These are interchangeable and can be combined with many different options to create a truly bespoke chair for the individual.

Please see page 26 for available OPERA backrest and seat sizes.

Don't know which chair?
Try POSE™

- Save time and money by avoiding assessment call-outs and charges
- Unobtrusive assessment option
- Complete at your own pace
- Can be used for self-assessment or assessing others
- Completely FREE service

OPERA 20

OPERA 20 chairs are the highest specification in the range, fitted with a smooth-knee tilt rocking action. This ensures optimum support in all movements and alleviates any pressure on the underside of the thighs. When rocking, the backrest angle remains constant which ensures consistent lumbar support. **OPERA 20** chairs come with a polished aluminum base and our newly updated pebble levers. These levers not only look attractive but offer enhanced ergonomic benefits. Operational instructions are easier to see and the pebble shape makes the levers easier to handle, which is ideal for people with health problems that affect their hands and arms.

The Mechanism

The pivot at the front of the seat offers the greatest rocking action on any of the **OPERA** chairs. A natural, smooth feel ensures the feet remain in constant contact with the floor whilst providing support for the underside of the thighs. The tilt mechanism can be left free-floating or locked in any position.

Don't know
which chair?
Try POSE™
ergosol.co.uk/POSE

Standard Features

- Tension adjustable rocking action
- Independent back tilt
- Back height adjustment
- Seat slide
- Seat height adjustment
- Inflatable lumbar support
- Sewn edge seat and back
- Polished aluminium star base and gas stem
- 23.5st/150kg weight limit
- 5 year warranty
- Soft floor castors

The backrest and seat can be sculpted specifically for you using our custom-fit service. See pages 14 and 15 for more details.

OPERA 30

OPERA 30 chairs offer a mid-range specification, fitted with a semi-knee tilt rocking action that is initiated from the mid-point of the seat. This ensures support in all movements and alleviates strain when leaning forwards or backwards. The backrest angle is independent to the seat and remains constant when the seat tilts which ensures consistent lumbar support.

The Mechanism

The semi-knee tilt pivots midway between the stem and the front of the seat allowing the chair movement to follow and support the body when rocking. The tilt mechanism can be left free-floating or locked into any position.

OPERA 50

OPERA 50 chairs are heavy-duty with an extended weight limit of 35st/222kg. The synchro knee-tilt rocking action moves in a ratio of 2:1 which opens up the body angle on recline. The design ensures support in all movements, reduces strain when leaning forwards or backwards and alleviates pressure on the underside of the thighs. The chairs include a heavy-duty mechanism, heavy-duty gas stem and an aluminium star base with black nylon caps.

The Mechanism

The knee-tilt mechanism pivots at the front of the seat which ensures that the feet stay in constant contact with the floor as well as alleviating pressure on the under-side of the thighs. The backrest angle remains constant when the seat tilts ensuring consistent lumbar support. The mechanism can be left free-floating or locked into any position.

OPERA 60

OPERA 60 chairs are our entry-level chairs with a specification that won't disappoint. The chairs use the same seat and backrests as the other **OPERA** chairs but come with a seat tilt instead of a rocking action. The seat tilt can be adjusted to achieve the optimum sitting position but must be locked in place. With a generous range of standard features and optional seat and backrest sizes, the **OPERA 60's** are an ideal solution for contract or ergonomic requirements when budgets are limited.

The Mechanism

The central pivot multi-tilt mechanism enables the seat to be angled and positioned as required. The seat tilt mechanism must be locked into place, meaning there is no free-float rocking action available.

Custom Fit Backrest & Seat

Custom-Fit is a design system that enables our upholsterers to sculpt chairs that map to more complicated body shapes. The system ensures an enhanced user experience with the appropriate amounts of support provided right where the user needs it.

While our POSE™ system is an excellent solution for specifying chairs, it is not sufficient for users with more complex physical conditions. This is why we developed the Custom-Fit design system.

The Custom-Fit design system consists of 6 backrest and 9 seat sizes plus an array of memory foam and wedges in differing thicknesses and densities. This system provides a great deal of flexibility, allowing us to really customise chairs to meet users' specific needs.

All assessments are carried out by fully trained Ergonomic Seating Solutions Staff* and the end result is a truly unique chair that fits well into the workplace environment.

** Please note that costs apply for assessments carried out at the user's place of work.*

Better by design...

Custom-Fit Backrest & Seat

A Custom-Fit assessment identifies what unique needs a user may have so we can design a chair that is truly bespoke to their physique. The design system is typically appropriate for users with the following conditions:

- Scoliosis
- Lordosis
- Kyphosis
- Spina Bifida
- Spinal Injuries
- Knee, Hip & Leg Issues
- Amputations
- Post-Surgery Issues

During the assessment, our technician creates a 3D backrest and seat from a selection of foam shapes in order to define the shape, size and density of the chair. This mapping informs the manufacturing process and we are able to use the impression to create a chair that is truly bespoke to the user's needs. Assessments can be carried out for backrests, seats and both combined.

CUSTOM-FIT ASSESSMENT

BACKREST & SEAT FABRICATED

We then use various densities and thicknesses of foam to build up the back or seat to suit the user. This ensures the chair is developed sympathetically, to provide maximum comfort and support for the user

CHAIR BUILT FROM MAPPING

The final part of the process is to construct the chair. The mapping guides our technicians as they craft a chair that is totally bespoke to the user's needs. The user is set-up in the new chair to ensure suitability

INITIAL CHAIR SETUP

The appropriate backrest (choice of 6) and seat (choice of 9) are chosen for the shape and size of the user. A basic chair setup is performed in-situ and this forms the basis for the next part of the assessment

CHAIR FABRICATION MAPPED

The fabrication is accurately and carefully documented with our special tool. This mapping provides all the details for the chair to be constructed for real in our factory

OPERA Product Options

Back Options

Memory Foam

- Pressure relief foam moulds to user's shape
- Includes sewn edges
- Provides great comfort

Lateral Support Memory Foam

- Pressure relief foam moulds to user's shape
- Curved sides for a 'hug-like' feel

Comfort Back

- Has contorting at each side to provide more lateral support, giving a 'hug-like' feel

Schukra Lumbar Support

- Has hand wheels for adjusting the height and depth of the internal mechanism, making it more adaptable to the user's needs

Sewn Edge

- Provides greater comfort with a softer front edge and gives a nicer finish
- Standard on **OPERA 20** chairs

Inflatable Supports

- Various types available in any combination
- Large inflatable support to offer increased lumbar support
- Triple cell lumbar support enables air to flow between 3 cells as the user moves
- Sacral for lower back
- Thoracic for upper back
- Lateral for side support

Specials

Heat Pads

- 3 heat pads can be positioned where required to soothe aching muscles
- Each heat pad is controlled individually

Massage Heat System

- 6 massage motors for targeted relief
- Various vibrating modes
- Integrated heat pad to soothe muscles

Left Hand Controls

- Only available on the **OPERA 30 & 50** chairs
- Seat height, back tilt, rocking action and Inflatable lumbar are fitted on the left side
- There is no seat slide option available

Restricted Mechanism

- Available on the **OPERA 30** only
- Limits rocking mechanism on tall and high gas stems for safety reasons

Upholstery

Bi-Colour Headrest

- Two-tone upholstery available on headrests for premium unique look
- Many colours available
- Match your corporate colours

Bi-Colour Seat & Backrest

- Two-tone upholstery available on backrests and seats for premium unique look
- Many colours available
- Match your corporate colours

Anti-Static Upgrade

- Anti-static fabric or vinyl
- Anti-static castors
- Chair distributes static electricity direct to earth

Seat Options

Memory Foam

- An additional memory foam layer can be added
- Pressure relief foam moulds to users shape
- Provides greater comfort

Comfort Memory Foam

- Provides contouring down each side of the seat to add thigh support and a memory foam layer for comfort

Split Seat

- Seat is split at the front
- Enables left and right side of seat to be set at differing angles
- Ideal for users with knee, hip and leg issues
- Available on **OPERA** 30, 50 & 60 (**OPERA** 60 has no seat slide)

Coccyx Cut Out

- Padding around coccyx removed for pressure relief
- Available open or covered
- Standard and bespoke sizes available

Coccyx Comfort (Covered)

- Softer foam positioned in coccyx area for extra comfort
- Foam is removable via zip at back of seat

Modified Seat Size

- Seat sizes can be reduced in depth and width
- Foam and shape can also be modified

Sewn Edge

- Provides greater comfort with a softer front edge and gives a nicer finish
- Standard on **OPERA** 20 chairs

Inflatable Thigh Support

- Inflatable air cell fitted singularly or as pair
- Provides support for thighs and buttocks

Ergo Response Air Cell Seat

- Air cell adjusts to movement providing constant support
- Helps activate core muscles

Left-Hand Controls

This left-hand mechanism places controls on the left-hand side of the chair and offers some other unique ergonomic benefits. The free-float and back tilt are released simultaneously, requiring the adjustment of only one lever. This allows the seat to tilt naturally, independent of the backrest, while the rocking action is engaged.

- Seat height, back tilt, rocking action and inflatable lumbar are fitted on the left hand side
- Available for Opera 30 & 50 chairs
- Not available with seat slide

OPERA Product Options

Armrests

A5 Armrests

- Premium comfort with 360° rotating PU pads
- Height, width and longitudinal adjustment
- Dual pivot points for enhanced pad rotation
- Seven points of adjustment
- Width-adjustable arm bracket

A4 Armrests

- Height-adjustable 18–28cm
- Depth-adjustable, retractable PU pads enabling closer working
- Twist adjustable pads
- Extended working range
- Width-adjustable arm bracket

A3 Armrests

- Height-adjustable 18–28cm
- Depth-adjustable, retractable PU pads enabling closer working
- Width-adjustable arm bracket

A2 Armrests

- Height-adjustable 18–28cm
- Depth-adjustable, retractable PU pads enabling closer working
- Width-adjustable arm bracket

A1 Armrests

- Height-adjustable 18–28cm
- Durable PU arm pads
- Width-adjustable arm bracket

Upholstered Armrests

- Height-adjustable with memory foam, fabric or leather tops
- Available in standard (24x10cm), wide (24x15cm) or bespoke sizes
- Width-adjustable arm bracket

Universal Arm Bracket & Handle

- Universal fixing bracket across the chair range
- Additional width adjustment via handle fixing
- Easy to retrofit, fit or change arms

Swing-Back Armrests

- Armrests fold back out of the way
- Ideal for wheelchair transfers

Gel Armrest

- Gel filled pads for extra comfort
- Height-adjustable
- Width-adjustable arm bracket

Head Rests

Z-Rest

- Concave cushion supports head
- Double pivot, combined with height adjustment provides outstanding fit

Mini Z-Rest

- Soft cushion supports head
- Double pivot, combined with height adjustment provides outstanding fit

Bi-Colour Neckrest

- Two-tone upholstery available on neckrests for premium unique look
- Many colours available
- Match your corporate colours

Gas Stems, Starbases & Footrings

Short Gas Stem

- Available on **OPERA** 20's, 30's and 60's

Tall Gas Stem

- Available on **OPERA** 30's and 60's
- Must use restricted mechanism on **OPERA** 30's

High Gas Stem

- Available on **OPERA** 30's and 60's
- Must use restricted mechanism on **OPERA** 30's

Super-High Gas Stem

- Available on **OPERA** 60's only
- Fitted with a 29" HD base and glides
- Auto-locking castors available

Non-Swivel Gas Stem

- Creates fixed chair by removing swivel function

Swivel Lock

- Handle allows chair swivel to be locked and unlocked
- Available in 7" & 9" sizes

27" Polished Aluminium Base

- Fitted on **OPERA** 20 chairs as standard
- Provides premium look

27" Polished Aluminium Base (with black caps)

- Fitted on **OPERA** 50 chairs as standard
- Provides premium look

29" Heavy-Duty Base

- Used with super-high gas stem for added stability

Footring

- Fitted to 60-H chairs as standard
- Ensures feet supported
- Height-adjustable

Castors

Semi-Braked Castors

- Castors for use on hard floor surfaces
- Rubber tread for improved rolling
- Castors roll with resistance to slow chair

Auto-Locking Castors

- Castors lock when pressure is applied to chair
- Provides stability when getting in and out of chair
- Ideal with high gas stems

Brake Unloaded Castors

- Castors lock when no pressure is applied to chair and release when weight is applied

Manual-Locking Castors

- Castors can be individually locked or left to run freely as required

Glides

- Plastic feet keep chair fixed at all times
- Fitted on 60-H and all high gas stems as standard

Anti-Static Castors

- Helps dissipate static

ORBIS

ORBIS chairs are an entry-level ergonomic solution with a specification normally associated with much more expensive chairs. The standard features provide fantastic support to assist in the prevention of work-related injuries. Two backrest and seat options ensure a great fit for most users. The chairs can be further adapted with optional extras for more bespoke solutions.

The Mechanism

The central pivot provides a multi-tilt mechanism which enables the seat and back to be angled as required. The seat tilt must be locked in place.

Standard Features

- Adjustable, lockable tilt
- Independent back tilt
- Back height adjustment
- Seat slide
- Seat height adjustment
- Inflatable lumbar support
- 23.5st/149kg weight limit
- 5 year warranty
- Soft floor castors

HALO Sit-Stand Chair

HALO chairs are designed for use in work environments where seating is required to enhance performance as much as provide a place to sit. The chairs facilitate fluid, unrestricted movement while keeping you fully supported which not only increases productivity but also improves wellbeing. The relatively modest proportions of the chairs ensure they do not dominate the workspace and can easily be positioned out of the way when not needed. HALO chairs are also great for use with sit-stand desks and for those simply seeking the health benefits of active work habits.

*Black base and stem as standard

The Mechanism

3D Mechanism

Halo 3D opens up the possibilities of what a work chair can be with 3D motion that intuitively follows your body movements. The Halo 3D mechanism pivots 360° around a central axis ensuring the seat tilts in the direction you need it to while you work. This keeps you fully supported while allowing you to reach further and work more efficiently.

Pro Mechanism

Halo Pro provides robust support and versatility that allows you to find the perfect position whatever your task. Continuous adjustments can be made to set the seat height, seat angle and back angle, allowing you to find the perfect position to suit your task. The back and seat angle are lockable giving you the confidence you are working from a strong base.

Stool Mechanism

Halo Stool is a great solution for when no backrest is required. Both seat height and seat angle are adjustable, allowing you to find the perfect posture to suit your work. The seat angle is lockable ensuring you have a robust position to suit whatever task you perform.

Leg Rests

Our range of leg rests have been created to provide a comfortable and supportive platform to rest the legs on. Sitting for long durations can put pressure on the knees and cause strain and the leg rest can help alleviate this. Users that suffer from knee problems, such as arthritis or ligament damage, find the leg rests particularly beneficial as they allow the leg to be straightened while seated. Leg rests are available with a single or double platform and the articulated version includes a bendable hinge so the user can set the leg rest specifically to their needs. All of our leg rests are height and tilt adjustable and include a layer of memory foam for extra comfort. Custom leg rests can be created with bespoke platforms and multiple gas stem heights.

Posture Supports

Our ranges of posture supports are available to support the back, seat and arms. They improve posture and comfort and can be used in most environments to enhance the support provided by standard seating. Back supports are designed to assist in the prevention and management of back pain whilst improving posture. The adjustable straps on each model enable them to be fitted to any chair and positioned as required. Seat supports vary between memory foam cushions for pressure relief and wedge supports for the correct alignment between the hip and knee. Memory foam arm pads are available in two sizes to suit different armrests.

SHIPPING COSTS

We ship to the UK, Northern Ireland, ROI and Europe.
Please contact us for a shipping quote.

CHAIR DELIVERY

Delivery of the goods shall be made to the customer's address via the most convenient ground floor entrance and the customer shall make necessary arrangements to receive the goods on the specified delivery date. We will make reasonable endeavours to despatch the goods on the agreed delivery date but do not guarantee to do so. The date of the delivery is an estimate and the time of delivery shall not be the contract essence.

PRICE & PAYMENT

The price shall be agreed with the customer and standard prices can be found within this price list. All prices are exclusive of VAT and are subject to change without any prior notice. We will endeavour to maintain the prices quoted but reserve the right to increase prices between acceptance and delivery of an order to take into account any increased costs we may have incurred.

WARRANTIES

We warrant that the goods will, at the time of delivery, correspond to the description given by us in the order confirmation. Our warranty covers all chairs against material and manufacturing faults and defects from the chair's production date. The warranty covers any necessary spare parts but labour and transport costs are not covered. Normal wear and tear is not covered by the warranty. Unless otherwise specified, the maximum user weight is 23.5 stone. The warranty is conditional on the upholstery undergoing normal cleaning.

All Opera models are guaranteed for a period of 5 years at 8-hour day use and 2 years at 24/7 use. This covers structural components and moving parts, with fair wear and tear on upholstery.

This guarantee applies to normal usage under office environment conditions. The guarantee does not cover chairs that are used outside the United Kingdom and excludes damage caused by impact or misuse.

CANCELLATION

We may, at our discretion, allow the customer to change or cancel an order up until production has begun. Once production has begun, an order cannot be changed and cancellation will incur a charge. Charges are 15% of the invoice total for the cancellation where the goods have not yet been delivered and 25% of the invoice total for cancellation after the goods have been delivered (excluding carriage which is non-refundable), providing the goods are returned to our factory carriage paid.
